Carbon Reduction Plan

Supplier name:Vifor Pharma UK Limited.....

Publication date:03/03/2025

Commitment to achieving Net Zero

Vifor Pharma UK Limited is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2021 - 2022	
Additional Details relating to the Baseline Emissions calculations.	
We have formalised our approach to meet the requirements of PPN-06/21 and can report against these requirements from 2021/22.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	0
Scope 2	61.1
Scope 3 (Included Sources)	27.6
Total Emissions	88.7

2022-2023 Emissions Reporting

Reporting Year: 2022-23	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	0
Scope 2	35.08
Scope 3 (Included Sources)	21.79
Total Emissions	56.87

2023-2024 Emissions Reporting

Reporting Year: 2023-24	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	0
Scope 2	24.88
Scope 3 (Included Sources)	25.82
Total Emissions	50.70

Emissions reduction targets

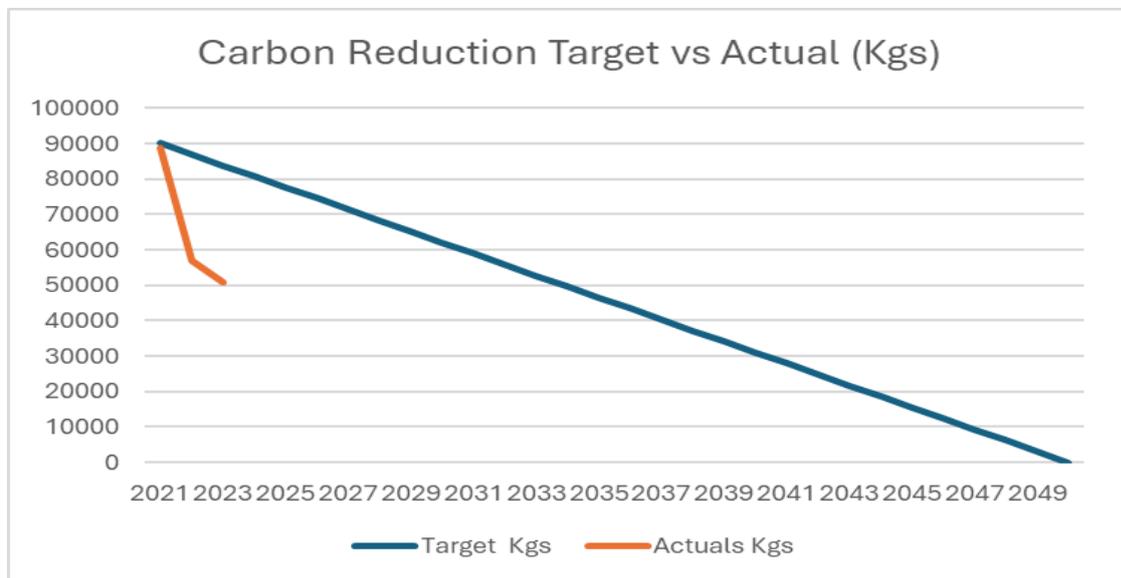

Vifor Pharma UK Limited is committed to achieving Net Zero emissions by 2050.

The company is a single site head office using electricity only, which is sourced and recharged from the landlord. The landlord is responsible for selecting the electricity supplier. The company also imports, stores and distributes its products via a third party warehouse and freight supplier. An allocation of the emissions related to Vifor have been obtained from the supplier. They are responsible for energy selection and usage.

Progress against Net Zero commitment will be tracked annually, and the graph below will be updated. In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets. We have already reduced our scope 1 and 2 carbon emissions to 0 tCO₂e by moving to REGO backed supplies from 04/12/21.

A majority, more than 95%, of CSL Vifor UK's upstream emissions for warehousing and logistics are covered by the third party's own Carbon Reduction Plan

Progress against these targets can be seen in the graph below:

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2021-22 baseline. The carbon emission reduction achieved by these

schemes equate to 290 tCO₂e, a 10% reduction against the 2021-22 baseline and the measures will be in effect when performing the contract

- The commitment to purchase electricity from known renewable sources, backed by a Power Purchase Agreement and Renewable Energy Guarantees of Origin Certificates
- We have revised our vehicle policy and introduced an e-vehicle and hybrid car provider that is available for the wider workforce and reinforces our commitment to sustainable travel beyond business journeys.
- Electric vehicle charging points in the car park to promote the use of electric vehicles.
- Motion sensor lighting
- Highly efficient air conditioning unit utilising a heat pump and heater exchanger.
- Optimising facilities managed assets through a structured process, identifying the scale of inefficiencies across individual assets, systems, and recognising viable energy improvement opportunities.
- Working from home programme to allow employees to reduce their office attendance.

In the future we hope to implement further measures such as:

Scope 2

- We will educate and raise awareness to our colleagues of the energy efficient measures that we will implement.
- We will perform regular audits of the office and monitor equipment and appliances that are typically left on stand by mode. Redundant equipment will be retired, old equipment will be assessed for energy efficient replacements .
- Continue working with our facilities management provider to ensure that they are aligned with CSL Vifor in adopting their own carbon reduction strategies and working towards Net Zero by 2050.

Scope 3

- Continue working with our logistics and distribution partners to ensure that they remain aligned with CSL Vifor and their own carbon reduction strategies in working towards Net Zero by 2050.
- Review and engage with our suppliers to determine that they have set their own Scope 1 and Scope 2 reduction targets.
- We will continue to review our Scope 3 emissions to establish further carbon reduction opportunities.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:
