

Sheffield Teaching Hospitals NHS Foundation Trust and CSL Collaborative Working
Executive Summary

Project title	Sheffield Kidney Institute and CSL Service Development Collaborative Working Project
Project rationale	• To establish a Band 7 Consultant led nurse-delivered medicines optimisation clinic for patients with IgA nephropathy and ANCA-associated vasculitis. • To deliver structured training to the nurse over an initial 3-month period to support safe and effective clinic delivery. • To implement a 12-month clinic programme and optimise use of NICE-approved therapies. • To evaluate clinical effectiveness, service impact and patient outcomes and share with other centres. • To generate real-world data to inform future service development and potential long-term NHS commissioning.
Project objectives	For Patients: • Provide equitable access to specialist GN clinic service and NICE approved treatment • Stratify existing patients to set treatment pathways thereby freeing up consultant time to see more complex GN patients • Enhanced education, support, and engagement for patients to manage their condition and treatment For the NHS: • To improve equitable access to specialist education, monitoring and treatment support across the regional catchment population. • Delay in progression to dialysis and transplantation, with associated cost savings • More efficient use of consultant time through task-shifting to trained specialist nursing staff • Development of a scalable, sustainable model of care for glomerular disease management For the Industry Partner:

	- Improved implementation of evidence-based care pathways and NICE technology appraisal recommendations for patients with glomerular disease. - Enhanced understanding of NHS service delivery challenges and opportunities in the management of glomerular disease. - Support of corporate social responsibility (CSR) objectives through partnership with the NHS to enhance patient care
Financial arrangements	Project Support: CSL Vifor financial contribution £46,561 Sheffield Teaching Hospitals NHS Foundation Trust indirect contribution £29,447
Summary of the roles and responsibilities of each party	Sheffield Kidney Institute Clinical Director to oversee project delivery for Sheffield Teaching Hospitals NHS Foundation Trust Head of Market Access, Value & Pricing UK and Ireland to oversee project delivery for CSL
Plans for publication	A project summary report will be published on the CSL website within 6 months of project completion
Project period	<i>November 2026 – April 2028</i>
